SECTION A

**IN-CENTER HEMODIALYSIS
Category of Service**

Planning Process for In-Center Hemodialysis Category of Service

For the In-Center Hemodialysis category of service:

1. The planning areas are the designated Health Service Areas
2. The utilization standard is a facility must operate at a minimum of 80 percent utilization rate, assuming three patient shifts per day per renal dialysis station operating six days a week.

**Inventory of Health Care Facilities and Services
and Need Determinations**

3. The need for end stage renal disease (ESRD) stations is calculated for a five-year period from the base year. The need for additional treatment stations is determined utilizing the following methodologies:
 - a. Five-year Projection:
 - i. Establish a minimum institutional dialysis rate by dividing the total number of institutional dialysis patients in the base year by the State base year estimated population in thousands and multiply the result by .6 (60%).
 - ii. Determine each planning area's experienced institutional dialysis rate by dividing the number of patients receiving dialysis in the base year by the planning area estimated population in thousands for the base year.
 - iii. Multiply each planning area's projected population in thousands five (5) years from the base year by the greater of the minimum institutional dialysis rate or the experienced institutional dialysis rate for the planning area to determine the estimated number of institutional dialysis patients.
 - iv. Multiply the planning area's estimated number of institutional dialysis patients by a factor of 1.33 (estimated increase in prevalence) to determine the projected number of institutional dialysis patients in the planning area for the projected year.
 - v. Multiply the projected number of institutional dialysis patients by 156 to determine the projected number of institutional procedures
 - vi. Divide the projected number of institutional procedures by 749 to determine the projected number of stations needed for the projected year.
 - vii. Subtract the number of existing stations from the projected number of needed stations to determine the excess or additional stations needed.

SECTION C

ALTERNATIVE HEALTH CARE MODELS

Planning Process for Sub-Acute Care Hospital Models

For the Sub-Acute Care Hospital Models:

5. The planning areas for Sub-Acute Care Hospital Models:
 - 1) the City of Chicago;
 - 2) Cook County outside the City of Chicago;
 - 3) DuPage, Kane, Lake, McHenry, and Will Counties;
 - 4) Municipalities with a population greater than 50,000 not located in the areas described in subsections (a)(1), (2), and (3) of this Section. ‘Municipalities’ means geographic areas designated as a Metropolitan Statistical Area (MSA) by the Bureau of the Census pursuant to the 1990 census but shall not include any counties within an MSA having a 1990 population of less than 35,000. Counties with a 1990 population less than 35,000 and which are located in an MSA are: Boone, Clinton, Grundy, Jersey, Menard, Monroe, and Woodford counties. These counties shall be classified as rural areas pursuant to subsection (a)(5) of this Section; and
 - 5) Rural areas, i.e., all areas exclusive of subsections (a)(1), (2), (3), and (4) of this Section.
6. Occupancy Targets: Modernization/Establishment 75%.
7. Need Determination: There shall be no more than:
 - 1) Three subacute alternative health care models in the City of Chicago; one in an existing licensed hospital, one in an existing licensed long-term care facility and one located on a designated site which shall have been licensed as a hospital under the Illinois Hospital Licensing Act within the ten years immediately before the application for a license (Section 30 of the Alternative Health Care Delivery Act [210 ILCS 3/30]) but which is not now currently operating as such.
 - 2) Two subacute alternative health care models in Cook County outside the city of Chicago; one of which must be located in an existing licensed hospital and the other in an existing licensed long-term care facility.
 - 3) Two subacute alternative health care models in DuPage, Kane, Lake, McHenry and Will Counties; one of which must be located in an existing licensed hospital and the other in an existing licensed long-term care facility.
 - 4) Two subacute alternative health care models in municipalities with a population greater than 50,000 not located in areas included in subsections (e)(1), (2), or (3) of this Section; one of which must be located in an existing licensed hospital and the other in an existing licensed long-term care facility.
 - 5) Four subacute alternative health care models in rural areas; two of which must be located in existing licensed hospitals and the other two in existing long-term care facilities.
